

ATILGAN

VERY SHORT RANGE AIR DEFENSE MISSILE SYSTEM

INTEGRATION CAPABILITY INDEPENDENT OF THE PLATFORM AND MISSILE TYPE

SHOOT-ON-THE-MOVE CAPABILITY

ATILGAN

Main Features

- Very short range air defense capability against fixed and rotary wing aircrafts, UAV's and cruise missiles
- 8 ready to fire Stinger missiles
- Integrated 12.7 mm machine gun
- Gyro-stabilized modular turret, mountable on a variety of platforms
- Target identification by IFF
- Passive surveillance, acquisition and tracking sensors, incorporated TV and thermal cameras
- Multi-pulse laser range finder
- Detachable operating panel for remote operation up to 50 meters

Advantages

- Eliminates external effects and operator mis-performance
- Autonomous or coordinated use
- Automated target tracking
- High fire power
- Very high hit probability
- Short reaction time
- Operable under all weather conditions
- Fire on-the-move capability
