BIOMETRIC IDENTITY

BIOMETRIC IDENTITY VERIFICATION AND ACCESS CONTROL SYSTEMS

Biometric Identity Verification and Access Control Systems are part of ASELSAN complete security solution for critical infrastructure protection, institutions and organizations. High security solutions are provided for physical biometric and card based access control, computer and application logon, datacenter security, time attendance and other needs.

Why Biometric Verification?

- Biometric data cannot get imitated nor forgotten like a password
- Secure against spywares since there is no password
- Biometric data cannot be shared with other users
- Biometric data cannot be used by unauthorized users
- Biometric verification is faster compared to the traditional methods

Hardware

- BioAffix Gate Extreme: Biometric Hand Vein and Card Reader Based Access Control Device
- BioAffix Gate Smart: Access Control Device with Touch Screen and Card Reader
- BioAffix Gate Force Mini: Multi Purpose Authentication Device
